

Visual Studio 2019 – Install and Guide

Install

To install **Visual Studio 2019**, you just need to do the following:

Visit [VisualStudio.com](https://visualstudio.com) and then from the **Visual Studio IDE** section choose **Download Visual Studio** then your versions such as **Community 2019**

Next on the **Thank you for downloading Visual Studio** page when the download prompt appears, select **Run**

Once downloaded, this should start the **Visual Studio Installer** and select **Continue** to begin the installation

Next once ready pick the **Workloads** you want to install such as **Universal Windows Platform development**

Visual Studio 2019 – Install and Guide

Guide

To **Create a new project** in **Visual Studio 2019** you just need to do the following:

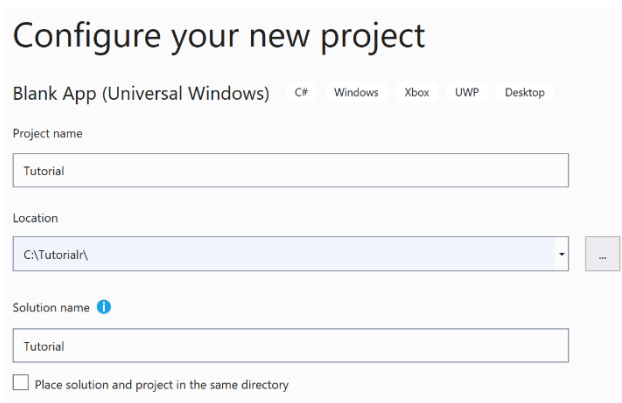

In **Windows 10** choose **Start**, and then from the **Start Menu** find and select **Visual Studio 2019**

Once done, from the **Get started** screen for **Visual Studio 2019** select **Create a new project**

Choose the project type such as **Blank App (Universal Windows)** and select **Next**

Then in **Configure your new project** enter a **Project name** and **Location** and select **Create**

Then in **Visual Studio 2019** there is a **Menu** at the top

Below this is the **Toolbar**, options there include **Local Machine** to start debugging

When an Application is running, the **Toolbar** will change to include other options including **Stop** to finish Debugging
